THE DISPOZ-A-BLADE KNIFE ADVANTAGE

Common to both **SELF-SET** and **POSI-SET** is the use of our time tested German quality double edge **DISPOZ-A-BLADE** knives. These economical disposable knives have triple ground and finely honed double edges. They come in High Speed Steel (HSS), suitable for most hard and soft woods and specially formulated Kobalt Steel, for more abrasive

or exotic woods. Since both HSS and Kobalt knives fit the same holder the optimum knife type can be used for the job at hand. **DISPOZ-A-BLADE** is manufactured to rigid DIN and ISO 9002 German Industrial Standards assuring consistent quality and dependability. For almost 3 decades they have been the trade standard for being far more cost effective than regular knives that require re-sharpening. **DISPOZ-A-BLADE** knives are always straight and balanced, and their factory ground edges provide peak machine performance and finish quality.

*With either **SELF-SET** or **POSI-SET** you have all the advantages of index tooling at a fraction of the cost.*

Extensive product information including installation demonstrations are available at www.dispozablade.com

SELF SETTING KNIVES

For your Planer, Jointer & Molder

Now Available in Two Foolproof Products

“SELF-SET® & POSI-SET®”

The TOTAL Solution for SIMPLE, FAST & ACCURATE KNIFE CHANGES in nearly every make and model machine.

The only instant setting knives that do not require altering your machine in any way.

INSTALL KNIVES IN SECONDS— NOT HOURS, Easy & Accurate “DROP & LOCK” Knife Changes *EVERY TIME* without special skills, set-up jigs or jack screws.

INSTANTLY WORKS IN ALL YOUR MACHINES— Optimizes machine performance

NO COMPLICATED MACHINE MODIFICATIONS— Or expensive special cutterheads

MORE ECONOMICAL THAN RESHARPENING— Top Quality Straight Factory Edges cost less than regrinding regular knives.

NEVER SHARPEN A PLANER KNIFE AGAIN— Consistent knife Quality Produces Superior Finishes with BIG SAVINGS

CHOOSE ECONOMICAL HSS— (High Speed Steel) Knives for most planing jobs— **OR LONG LASTING KOBALT KNIVES**— for the Tougher more Abrasive woods.

AFFORDABLE INDUSTRIAL QUALITY— For the Custom Craftsman and the large wood products manufacturer.

Eliminates the two most dreaded tasks associated with maintaining a machine — getting knives sharpened straight without weakened, over ground edges and setting those knives precisely back into the cutter head.

BOTH SELF-SET® & POSI-SET® eliminate all of the hassles of changing and sharpening knives. **DISPOZ-A-BLADE's** innovative 2 part design separates the cutting part of the knife from the support part. Both **SELF-SET & POSI-SET** consist of a disposable double edge knife that attaches to a reusable holder. Together they equal the dimensions of your original knife. Each precision holder has locking pins and magnets which precisely match the holes in the **DISPOZ-A-BLADE** knife.

SELF-SET holders have the addition of 2 built in stops that simply rest on the outside diameter of the cutter head when in the proper position. **POSI-SET** magnetic knife supports hold the original **DISPOZ-A-BLADE** holder and knife combination to the proper height from the bottom of the knife pocket.

Both SELF-SET & POSI-SET ARE AVAILABLE in lengths to 36"

**Simple 2 Part
No Sharpen Knife Design**

DISPOZ-A-BLADE'S holder and double edge disposable knife are the dimensional equivalent of the knife you are using now in your machine's cutter head. Various sizes and types of holders are available which attach to the same high quality **DISPOZ-A-BLADE** knife insert. This holder-knife combination instantly installs in your machine without any modifications.

SELF-SET®

The Latest Breakthrough That Makes Changing Knives a Cinch

SELF-SET has received industry wide recognition as a new product that has significantly increased shop productivity and work quality while being very affordable.

HOW TO ORDER SELF-SET

Simply tell us the make and model of your planer or jointer and the size of the standard knife it uses. We will supply a 1st time Start Up Kit that includes one set of reusable **SELF-SET** knife holders and one set of disposable double edge HSS **DISPOZ-A-BLADE** knives that are correctly sized for your machine. All that is required for future knife changes is the purchase of inexpensive **DISPOZ-A-BLADE** double edge replacement knives.

Simple is Better – SELF-SET is Simple!

Call our toll free number to determine the best system for your machine 800-557-8092

How SELF-SET® Works

Unique to the industry, the **SELF-SET** knife installs in your machine's ordinary stock cutter head, therefore eliminating the need to buy a special costly cutter head which is required by every other quick change knife system.

SELF-SET knives require no machine modifications or the use of jack screws, springs, setting gauges, jigs or measuring tools. No special skills are needed to quickly change knives with precision accuracy every time.

Knife changes are as easy as snapping the disposable double edge knife onto the **SELF-SET** holder and sliding them into the knife pocket until the precisely located stops contact the outside surface of your machine's cutter head. The time it takes to change knives has now been reduced to the time needed to loosen the cutter head gib bolts, replace the dull edge and retighten. **SELF-SET** eliminates all the time and frustration associated with changing knives and is much more economical than buying and re-sharpening standard knives. To greatly extend the usable life of each knife, nicked knives that are still sharp can now be easily side shifted in opposite directions to produce a smooth line free finish.

POSI-SET®

POSI-SET magnetic knife supports replace troublesome push springs, setting bars and jackscrews to achieve true "Drop and Lock" knife installation. Simply place 2 **POSI-SET** knife supports in the bottom of each knife pocket of your cutter head and observe how **DISPOZ-A-BLADE's** holder and knife combination are automatically locked in place while you tighten your gib screws.

DISPOZ-A-BLADE's consistent knife height eliminates any further adjustment. Nicked knives that are still sharp can now be easily side shifted in opposite directions to eliminate lines in the planed wood surface. This is just one more feature that greatly extends the usable life of each **DISPOZ-A-BLADE** knife.

Planer Knives ANYONE Can Change at a price ANYONE Can Afford!

Call our toll free number to determine the best system for your machine 800-557-8092

POSI-SET knife supports are stocked in all sizes. This provides the flexibility to outfit every machine regardless of age and design. So when Self-Set is unavailable for a particular machine, **POSI-SET** always is.

HOW TO ORDER POSI-SET

Simply tell us the make and model of your machine and the size of the standard knife it uses. We can cross reference most machines. But should you have a machine not in our data base we will instruct you how to simply measure the depth of your cutter head's knife pocket. We will supply you with a 1st time Start Up Kit that includes the correct size and number of **POSI-SET** knife supports, one set of reusable **DISPOZ-A-BLADE** knife holders and one set of double edge HSS **DISPOZ-A-BLADE** knife inserts that are properly sized for your machine. All that is required for future knife changes is the purchase of inexpensive **DISPOZ-A-BLADE** double edge replacement knives.

How POSI-SET® Works

Easy & accurate knife changes are a reality because **DISPOZ-A-BLADE** is always the same dimension from the cutting edge to the holder bottom. The **POSI-SET** Knife Support System automatically sets The **DISPOZ-A-BLADE** to the proper height without any adjustment – saving hours of set-up time. Consistent weight between knives assures balanced vibration-free operation.
